Air Admittance Valves

FEATURES & BENEFITS

Document H Clause 1.31 mandates that ventilating pipes exposed to outside air should terminate at least 900mm above any building opening within 3 meters. Croscos Air Admittance Valves, however, enable external soil pipe installation within 3 meters of openings, aligning its height to internal installations—just 200mm above the pipe's highest water entry point.

- Prevents loss of water from trap seals.
- Provides early warning indicator to potential blockages.
- Conforms to BS EN 12506.
